## Professional Summary

---

Software Developer with strong foundations in Data Structures and Algorithms and Full-Stack Development, skilled in building responsive, scalable, and user-focused web applications. Proficient in developing end-to-end solutions, designing RESTful APIs, working with databases, and writing clean, efficient, and maintainable code. Strong problem-solving and analytical skills with a passion for learning new technologies and building real-world software solutions.

## Technical Skills

---

- **Programming :** C++,HTML, CSS, JavaScript, Tailwind CSS, React, Node.js, PostgreSQL.
- **Core Concepts:** Data Structures, Object-Oriented Programming, Algorithms and Fullstack.
- **Debugging & Code Quality:** Logical error analysis, refactoring, code reviews, clean-code practices.
- **Testing:** Edge-case handling, test case design, debugging workflows.
- **Tools & Technologies:** Git, GitHub, Android Studio.

## Experience

---

### Cloud Computing – Hands-on Experience (AWS)

- Hands-on labs using AWS; worked with EC2, S3, IAM, and VPC for cloud resource deployment.
- Used Amazon S3 for cloud storage, file management, and access control.
- Performed basic deployment and monitoring of applications in a cloud environment.

## Projects

---

### CareerPilot — AI-Powered Career Management Platform

- Developed a full-stack AI-powered career management platform that helps job seekers discover relevant opportunities, optimize resumes, generate application content, track applications, and improve career readiness.
- Built an AI Resume Optimizer with ATS/match scoring, actionable improvement suggestions, resume version management, and automated cover-letter and recruiter-message generation.
- Developed an application tracking system with Kanban and list views, application status management, calendar scheduling, career assessments, and performance reports with visual analytics.
- Integrated an AI Career Assistant that provides structured career recommendations, skill-gap insights, job-match scores, and personalized guidance based on user profiles and career goals.
- Designed a scalable modular architecture using React, TypeScript, Node.js/Express, PostgreSQL, REST APIs, and React Query, with reusable components, domain-based services, form validation, and responsive UI.
- Added data visualization and analytics using Recharts and implemented a consistent design system with Tailwind CSS, reusable UI components, and interactive match/readiness scoring indicators. The current codebase confirms React, TypeScript, React Query, React Hook Form, Zod, Recharts, and Tailwind CSS as core technologies.

## Certifications

---

- Python Programming Certification – Coursera
- Git and Version Control – Coursera
- React Native – Coursera
- AWS Fundamentals - Coursera
